

Can Collecting

C.J., Edison, and the school kids have been recycling. Use the chart below to answer the questions.

Each  stands for 5 cans.

Aluminum Cans Collected

- How many cans did Room 1 collect? _____
- How many cans did Rooms 1 and 2 collect in all? _____
- How many more cans did Room 2 collect than Room 3? _____
- Which room collected the fewest cans? _____
- How many more cans did Room 4 collect than Room 2? _____
- How many cans did Rooms 3 and 4 collect in all? _____

If you are not recycling at home then begin by collecting a variety of recyclable materials. Together create a chart just like the one above to keep a record of how many pieces of “junk” you and your young learner have recycled. Post this chart on the refrigerator. Your child can draw in the items or use stickers to record the recycling.
