

SEQUENCING NUMBERS

Starfish Surprises

Look at each number pattern carefully. Write the missing number in each pattern on the line. The starfish is covering the number.

CJ Says:

Put 10 beans in a cup and ask your child to count them. Write the number 10 on an index card. Put 10 beans in a another cup and ask your child to count to figure out the total. Write 20 on another index card and place it beside the second cup. Continue until you have 10 cups with 100 beans in all. Then skip count to 100 by 10's. Repeat this activity for skip-counting by 2's and by 5's.
