

**IDENTIFYING MISSING FACTS**

## What's That Number?

Help C.J. and Edison get inside the bone vault by solving these problems. Fill in the missing number. Watch the + or - signs!

Example:

$$5 + \text{[4]} = 9$$

①  $6 + \text{[ ]} = 6$

②  $4 + \text{[ ]} = 8$

③  $7 - \text{[ ]} = 5$

④  $9 - \text{[ ]} = 5$

⑤  $6 + \text{[ ]} = 10$

⑥  $\text{[ ]} + 1 = 2$

⑦  $\text{[ ]} - 8 = 1$

⑧  $\text{[ ]} + 9 = 11$

⑨  $8 + \text{[ ]} = 12$

⑩  $\text{[ ]} - 7 = 4$

⑪  $12 - \text{[ ]} = 6$

⑫  $\text{[ ]} + 8 = 16$

CJ Says:

Put four paper cups on a table. Then add three more cups. Ask your child to tell you the addition sentence that describes the cups ( $4 + 3 = 7$ ). Write the number sentence on a sheet of paper. Next, have your child close his eyes as you erase the 3 and remove three cups from the table. Ask your child to look at the equation and the cups and tell you what number is missing. Repeat with other addition problems.
